

# Brookland Transportation and Streetscape Study

## Introduction

The District Department of Transportation, along with a consulting team from David Volkert & Assoc. Eng., P.C. and Michael Baker Jr., Inc., is embarking on a study of the Brookland Area. The Brookland Transportation and Streetscape Study will focus on comprehensive transportation and streetscape design to enhance safety and strengthen economic development and vitality of the community.

## Study Corridors

- Michigan Avenue from North Capitol Street to Eastern Avenue.
- Monroe Street from Michigan Avenue to South Dakota Avenue, N.E.
- 12<sup>th</sup> Street, N.E. from Michigan Avenue to Rhode Island Avenue – Primary Streetscape Corridor

## Elements of the Study

- Transportation analyses of existing and future conditions based on current travel patterns and future travel, land use and demographic projections as identified by the Metropolitan Washington Council of Governments for 2025.
- Analysis of the existing and development of enhanced streetscape elements along the 12<sup>th</sup> Street corridor and along the Monroe Street corridor between 12<sup>th</sup> Street and the Brookland Metro Station.
- A series of Study Advisory Committee (SAC), ANC and community inputs in every phase of the Study.
- A series of Public Meetings, Community Walk, 2 Community Workshops (Completed in October and November 2004)
- Hand, email, radio announcements on local stations or mail distribution on meeting notices.

## Current Status - Transportation Study

- Data collection for existing conditions for original 10 intersections and an additional 5 intersection completed.
- Transportation Analyses for existing conditions for 15 intersections complete.
- Existing Conditions Assessment Report scheduled for completion January, 2005 and will be posted on the [ddot.dc.gov](http://ddot.dc.gov)

## Current Status - Streetscape Study

- Existing Streetscape element inventory completed.
- Possible Short term and Long Term Streetscape Solutions Identified.
- Existing Conditions Assessment Report scheduled for completion January, 2005 and will be posted on the [ddot.dc.gov](http://ddot.dc.gov)

BRICKS SIDEWALKS  
ARE BEAUTIFUL!  
HOWEVER, WHEN IT RAINS  
& FREEZES OVERNIGHT  
THEY BECOME A SHEET  
OF ICE, ARE PAVES  
BETTER? (EVEN PAVES  
THAT LOOK LIKE BRICKS)

Changes must include entire area -  
not just 12<sup>th</sup> Monroe

Study and follow up must be done  
on the volume of traffic on 12<sup>th</sup> Street.  
This is especially true on area from  
12<sup>th</sup> Monroe to 12<sup>th</sup> Franklin. No stop  
signs - no lights - - high rate of  
speed. Also why should vehicles such  
as tow buses travel this area

Any changes should include  
the upkeep of the area. This  
should be an acceptable budget  
item.

Streets without sidewalks, but have increased pedestrian traffic due to the proximity to the Human Resources Dept at 14th & Franklin streets should be considered a priority. There is also a problem with trash.
